PRESS RELEASE

Redefining Luxury Travel through Shared Experiences

In a groundbreaking move to revolutionize the world of private aviation, Jetworld introduces its innovative concept, Jetworld Community. The concept is simple yet revolutionary: Like-minded travelers unite within a community that provides them with a platform enabling the shared use of private aircraft for their travels. This innovative approach leads to optimal use of the cabin space of private jets, leading to a reduction in the number of individual flights and, consequently, a drastic decrease in carbon footprint. As a result, Jetworld Community not only fulfills the desire for luxurious air travel but also makes it more environmentally sustainable than ever before.

Business club in the sky

The key to Jetworld Community lies in its ability to offer a semi-private flying experience. Members can share flights with carefully curated companions, ensuring a shared journey that not only enhances social interactions but also significantly reduces the cost of private air travel. This pioneering approach aligns with the growing global consciousness towards responsible and sustainable travel practices.
By bringing these travelers together, Jetworld Community optimizes the use of private jets, reducing the overall carbon footprint associated with exclusive air travel. In addition, Jetworld also hosts 2 exclusive, extraordinary "on the ground" events each year for all members.

Exclusive flight-sharing platform

The Jetworld Community platform operates as a dynamic community, fostering connections between individuals with similar travel preferences, and traveling to popular destinations and events such as Formula 1 in Monaco, Mipim in Cannes, UEFA EURO 2024 in Germany, the Olympics in Paris, you name it. This avant-garde platform aims to diminish the environmental impact of private flights by centralizing and connecting like-minded travelers, enabling them to share semi-private flights.

Cost-effective alternative

By sharing flights, passengers gain access to a more cost-effective alternative while still relishing the luxury, comfort, and convenience that private jets provide. This model not only democratizes access to exclusive air travel but also addresses concerns about the environmental impact associated with empty or underutilized private flights.

Eco-conscious travel

Jetworld Community is set to disrupt traditional notions of private aviation, promoting a sense of community among elite travelers while simultaneously contributing to a more sustainable future.
Jetworld Community aims to redefine luxury travel through shared experiences, emphasizing the importance of sustainability without compromising on opulence. As the aviation industry evolves, Jetworld is leading the way, inviting individuals to soar to new heights while collectively reducing their environmental footprint.

VIP concierge service all year round

Jetworld Community wants members to benefit from their membership no matter what, even when they are not flying. That is why members enjoy VIP concierge service year-round. The Jetworld concierge service deals with booking your favorite restaurant or hotel, in Belgium or at any destination. Do you want to book a party box at Ibiza's most popular DJ club or a VIP package for a top event, the Jetworld concierge service will take care of it.

Jetworld rents private flights to any destination in Europe and was founded in 2021 at the initiative of Jessica Espino Gallego. Jetworld aims to create a thriving and fast-growing community where shared private jet travel connects like-minded individuals, making luxury aviation accessible, sustainable, and socially enriching.
